**Re: Compliance Evaluation Inspection March 18, 2015
Workman Hog Farms State Operating Permit SOPC00227
Adkinson Road South Fulton, Obion County, TN**

Dear Mr. Workman;

Paul Brawley and I conducted a Compliance Evaluation Inspection (CEI) of Workman Hog Farms on March 18, 2015. At the time of inspection, you had two pit barns with no swine housed on-site, however; you were expecting a new load of swine on Friday March 20, 2015. Your records of waste storage system inspections, stormwater controls, daily rainfall, daily waterline inspections, compost temperature, land application, and soil analysis were complete. You showed us an electronic copy of your latest manure analysis and emailed us a copy of it on 3-19-15. At the time of our inspection you had not submitted your 2014 Annual Report, however; you emailed it to us on 3-19-15. In the future, please submit your Annual Report by February 15 each year, for the preceding year, as it is a condition of your permit coverage.

You indicated you were transferring some manure to a third party and knew approximately how much manure had been transferred, however; you were not maintaining records on the manure transfer and third party transfer forms. We provided you a copy of the third party transfer form and manure transfer form. Please maintain a record of all future manure transfers on the forms provided.

At the time of our inspection you did not have a rain gauge installed at your farm. You indicated that you did have a rain gauge installed on a t-post but were having trouble getting it to stay in place and had started using a weather app to get rainfall data for your farm. Please re-install and maintain a rain gauge on your farm to keep your daily rainfall records.

At the time of our inspection there was a depressed area holding water noted between the two hog barns near the pit pump-out. Please repair this area so that water does not pond in this area.

Mortalities are composted on-site in a covered compost shed. There were some excavated areas behind your compost shed for connection to downspouts. A PVC pipe connected to the

downspouts will carry rainwater away from the compost shed to a ditch. Please complete this work as soon as possible. You indicated that you were having some trouble with your compost. We noted there was some liquid coming from some of the compost bays and that there was a strong odor. Almost all of your bays were completely full of compost. We recommend you contact your local UT Extension office or NRCS office for on-site technical assistance with your composting. The Obion County UT Extension office is located at 302 South 3rd Street Union City, TN 38261 and their phone number is 731-885-3742. The local NRCS field office is located at 1216-B Stad Avenue Union City, Tennessee 38261 and their phone number is 731-885-6480, Ext. 3. TDWR will conduct a follow-up visit in the future to re-evaluate your compost shed.

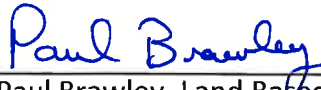

We appreciate you taking time from your schedule to meet with us for the CEI. Also enclosed, with this letter, is a copy of the completed Facilities Inspection Report from our visit on March 18, 2015.

If you require assistance or have or have any questions please call me at 731-512-1305 or by email at Kevin.X.Smith@tn.gov.

Thank You,

Kevin Smith, Environmental Scientist 3
